Resolution Copper donates major electrical repairs to Superior Little League

By **Mila Besich-Lira**
Superior Sun

Like most of the aging facilities in town, the Superior Little League facilities have been in need of some major repairs not only for aesthetics but also for the safety of the players, league officials and spectators. Many Little League volunteers can tell you stories of sparks flying, not because of a bad call or cold nacho cheese, but because literally there would be times that sparks would fly as the lights were turned on or off for the night, and concession stand outlets would pop, meaning that crock pots would stop working and there would be cold cheese, (no one likes cold nachos, right). This was not only an inconvenience but also a big safety concern for league officials. For the past five years league leadership has been addressing these safety concerns but the funding for electrical repairs would be costly.

When Resolution Copper got involved with the score board installation last year, they also saw the need for the electrical repairs and stepped up to the plate to make those repairs. "Superior Little

Take a Hike: Enjoying the Great Outdoors Year-Round

(StatePoint) Just because the weather is cooler, doesn't mean it's time to hibernate. With the proper equipment, preparation and motivation, any time of year is the perfect time to get outdoors for an adventure. And you don't have to look far for a great hike. Across the country, there are 59 gorgeous National Parks and thousands of state parks to choose from, comprising tens of thousands of miles of trails.

Hitting the trail this season? Make sure you're well-equipped to handle whatever comes your way.

• **Footwear:** Your regular running shoes may serve you well on a gentle slope in the warmer months, but in cool weather at high altitudes, different precipitation and terrain may require something sturdier, more insulated and definitely waterproof. Check the weather report and conditions of the trail before you go and outfit your feet accordingly.

• **Hydration:** Don't be fooled into thinking that staying hydrated is not important in cooler weather. As always, carry more water than you think you may need in case of emergency.

If you're hiking in more extreme weather conditions, you may need an insulated water bottle to handle the temperature. Look for options that are easy to carry and open so you don't need to remove your gloves to quench your thirst.

• **Fuel:** Whether you're hitting the trail for a leisurely afternoon jaunt or you're powering through a challenging climb, hiking burns calories, especially in colder weather, when your body expends energy trying to restore its natural body temperature. Staying fueled is important.

Pack snacks that are high in energy, easy to eat and won't weigh you down, such as trail mix or granola bars.

Stop Questioning God

There are times when we wonder just what it is that God is doing. That is when God reminds us of Isaiah 55:8 where it says to us: "for My thoughts are not your thoughts, neither are My ways your ways."

He also tells us to trust Him, to have faith in Him. When we are surrounded by turmoil and uncertainty, we don't naturally trust or believe. He may not do things as we would, but they still always work out.

In Isaiah 55:11 we read, "When My Word goes out from Me, it will not return empty. It will accomplish what I desire and achieve the purpose for which I sent it."

He desires to bless us and have us to live in victory and not in defeat. So stop questioning Him and simply trust what He is doing in your life. Learn to walk life's paths by faith in God and expect your miracle to happen!

League cannot thank Resolution Copper enough for their continued support of the League," explained Vanessa Navarrette the treasurer for the Superior Little League.

The repairs included repairs to the fused-isolation switch panels feeding the metal halide floodlights and other miscellaneous loads were old and worn. The switches were not completely closing and had no ground conductor that connects the utility SES with these main panels. In addition, auxiliary loads were tapped-off the line side of the switches without proper short circuit protection. The existing conductor that fed the panel downstairs was undersized for the loads in the concession.

To remedy the deficiencies, a 200 amp circuit breaker panel was added inside the announcer's booth. All loads now feed out of this panel with the proper short circuit protection.

The field-light switches were replaced with new magnetic lighting contractors and the risers were replaced with new continuous conduit risers. The concession area now feeds from this new panel.

This eliminates the requirement for the add-on (second) meter drop. This will be a money savings to the little league by eliminating the utility meter charge for a second meter.

An exposed outlet in the auxiliary shed/restroom building was properly attached to the wall with an adequate cover. Lastly, the tankless water heater was burned-up and this was replaced.

Oracle SailCart dedication held

Artist Chris Lucic addresses the crowd at the dedication of the Oracle SailCart.
John Hernandez | Sun

By John Hernandez
Copper Area News

On Sunday, Jan. 4, 2015 a dedication ceremony was held for the Oracle SailCart sculpture. Chris Lucic, artist and designer of the SailCart spoke in front of 80 people

who came to thank those responsible for the sculpture and its installation. Chris told the story of how the Oracle SailCart got to where it is today from the idea of the Ore Cart Trail to the volunteers who made it happen. He also talked about the meaning of

the SailCart and how it relates to the history of Oracle and the mining legacy of the Tri-Community.

Chris thanked all of the people that made the sculpture's installation possible. The SailCart was then "christened" by the Oracle Fire Department with an "arc of water" sprayed over the public sculpture. The SailCart is located on American Avenue next to the Post Office.

CORRECTION: In last week's article about the ore SailCart in the *Superior Sun*, it was erroneously reported that Albert Weldon had survived a storm while sailing in the clipper ship Oracle around the Cape of Good Hope. It should have been Cape Horn at the bottom tip of South America and not the Cape of Good Hope off of Africa. Thank you to Donald Paddock for pointing out the error.

Artist Chris Lucic, left, is pictured with Mary Ellen Kazda and Frank Pierson, who agreed to host the SailCart on their property.
