## TEMPORARY RV PARKING PERMIT ORDINANCE

The Town of Superior has recently completed an extensive public hearing and review process of its RV Code. This was driven by a desire to produce a more fair and flexible set of rules for our officers to enforce.

Previous zoning code had two main provisions:

1. RVs must be stored behind the front line of the house or behind a fence.
2. No RV may be occupied unless it was in a permitted RV park.

**The Planning and Zoning Commission and The Town Council has voted to change code in the following ways.**

1. The RV may be stored behind the front setback. In most residential districts, this is 20 feet. If you cannot comply with this:
  - a. A temporary permit of 15 days may be granted by the Town Manager.
  - b. A longer permit may be granted by the P&Z (Planning & Zoning) for up to 6 months for unusual circumstances.
2. Use of the RV as a residence is now allowed on a temporary basis, with a permit.
  - a. A temporary permit of 15 days may be granted by the Town Manager.
  - b. A longer permit may be granted by the P&Z for up to 45 days.
  - c. A permit may be extended when the resident has received a building permit for a permanent house on the same lot upon which the RV is to be located.

The new code will take effect on **May 11th**, and the Town will begin sending courtesy notifications and attempting to contact those RVs that are in violation.

We will work with you to find solutions within the code, so please feel free to reach out the Officer John Britton here at Town Hall if you feel your RV might be in violation.

Augie Hing, Marisa Estatico, Makayla Martinez and Kale Major were all big winners at the Honors assembly.

## The Streets of Superior, a report from the town manager

Over the last decade, the roads in the Town of Superior have been in a steady state of decline. After the Great Recession beginning in 2008, the Town used its reserves of street maintenance money to make up a huge revenue shortfall. At the same time, the new tax money coming to the town significantly decreased, as the state swept the funds to balance its own budget. Almost no significant maintenance was completed during this period, and for several years the Public Works crew was not even allowed to purchase asphalt for potholes. The deferred maintenance piled up, and many streets reached the point that it was questionable if they were even savable. The town piled up nearly \$3 million of debt to its own streets fund.

In 2016, we received a grant to evaluate and prioritize the maintenance of every street in Town. This Pavement Assessment Study identified a daunting \$6.7 million-dollar price tag for the needed maintenance to our streets. The town gets, just over \$350,000 a year in street funding. There is no way for the town to borrow this much money all at once, so we are left to chip away at the problem with what we do have available, and to look for creative ways to stretch a dollar.

Over the last three years, the town has been working hard to dig itself out of the deep hole in which it found itself. We have spent heavily on the streets, putting over \$60,000 into just asphalt to fill potholes. We have paid down our debt to our streets by about \$1 million. Everywhere you look, you can see some sort of progress. You can also see areas where we are losing the battle. Just patching the holes is a losing proposition. We continue to fight on, and we have arrived at a plan to at least stabilize the streets, so we do not lose anymore. Water is the enemy of pavement, so the key is to keep it out. Here are the steps in a nutshell:

We patch the streets as well as we can using a grinder to remove areas of extreme alligatoring.

We crack seal all the small cracks to further stabilize and seal the road.

We seal coat the road with rubberized paint to fill the remaining crack to keep water from seeping into the pavement. This also creates an attractive finish.

Our first test of this was on High School Avenue between Main and Lime. This road was failing, with constant potholing. The repair has held much better than expected, and the value of our approach was proven. We then completed a similar project on Main Street, at the cost of 1/3 that of slurry seal. The concept proven, we are ready to kick it into high gear. The next project, happening this month, is Pinal, Copper, Stansberry, and Santa Rita. Patching and crack sealing are nearly complete, and the seal coat will begin next week. Next year we are doubling the staff dedicated to streets, and it is our goal to stabilize every street in town the same way over the next two years.

We are aware of the pothole that frustrates you, and it frustrates us as well. We will be doing our best to patch all of those too. Please help us by telling us if there is one that is especially bad so that we push it up the list. Call or drop by Town Hall to submit a work order. Please also be patient with us. We have a small staff, and they are doing their best to make a real positive change for the community. With your help and support, you will begin to see the signs of real change, even on the fractured pavement of our streets.

Thank you,
